Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Green et al., U.S. Pat. No. 6,808,835 B2.

Rejection of claims 1-5 drawn to an electrical energy generating device.

Green et al., teach an electrical energy generating device comprising a cell (abstract) having at least a hydrogen electrode (col. 1, lines 12-30), a proton conductor film (col. 1, lines 12-15), an oxygen electrode (col. 1, lines 25-30), and a sheet cover having an air permeability and a waterproofness (col. 3, lines 35-55), wherein the sheet shrouds the cell (col. 4, lines 64-67). It teaches the sheet cover is formed of micro-porous polyolefin (col. 3, lines 41-51). It also teaches a water-absorbent sheet having

Art Unit: 1745

an air permeability and a water-absorbing property provided inside the sheet cover, so that the water absorbent sheet shrouds the cell (col. 3, lines 18-28). It teaches the water absorbent sheet has numerous apertures (col. 3, lines 18-35). It also teaches the device as described in claims 6-11 and 16-20 and 25-27 (col. 4, lines 15-24; col. 5, lines 29-66). It teaches the thickness of the hydrogen plate and air plate is 0.12 mm (col. 4, lines 64-67 and col. 5, lines 1-4). It also teaches the hydrogen plate and air plate are formed of stainless steel (col. 4, lines 64-67 and col. 5, lines 1-4).

Thus, the claims are anticipated.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela J. Martin whose telephone number is 571-272-1288. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.
